

Stetson Harding

Software Developer

Software Developer looking for an opportunity to make an impact and grow my skill set, while learning and mastering new technologies as needed. A self-starter with excellent written and verbal communication skills that thrives in a collaborative environment, and is passionate about building meaningful user experiences while working with others

WORK EXPERIENCE

The Kushery (Remote)

Front-End Developer

2019 - current

- Develop and implement highly responsive user interface components using the latest features in React.
- Test and maintain company's webpage while keeping the user experience in mind, making sure website is user friendly and fully responsive.
- Optimize webpage performance as needed making sure page size, page requests, and page speeds are all fast and efficient. Thus, improving conversion rates, generating more leads, and increasing revenue.
- Increase search visibility using up to date SEO techniques and Google Analytics.
- Create advertisements with Adobe Creative software for magazines and flyers all while having a keen eye to the detail, look, feel, and message the advertisement displays.
- Create and manage multiple Google Business accounts and Google Advertisements.

Earthbound Corporation

Warehouse Manager

2014 - 2019

- Reduced business losses by maintaining inventory and managing quality assurance for packaging and delivery.
- Managed, onboarded, and mentored employees to build an inclusive work environment optimized for productivity and retention.
- Utilized as a resource by employees to resolve issues or conflicts regarding workflow.

PROJECTS

UFO Sightings

- Built fully in React.js using Functional Components, Hooks, and React Router.
- Implemented Firebase Realtime Database for backend, storing all UFO sighting information.
- Built pagination with Firebase for a clean user experience and to increase performance.
- Added a feature where the user can click to see their UFO sighting location on Google maps.
- Implemented Bootstrap for user friendly responsiveness.

Mockup Ecommerce Website

- Fetched the Unsplash API to gather images based on user search query.
- Used React Context for shared state management.
- Implemented React Router for user friendly site navigation.
- Built features to favorite selected images for later use, and add/remove selected images in shopping cart.
- Implemented a user friendly mocked checkout workflow.
