LinkedIn: [LinkedIn](#) | Portfolio: [Portfolio](#)

Motivated and detail-oriented software developer seeking an enriching role to further develop my skill set while learning and mastering emerging technologies. An innovative thinker with effective communication skills, that thrives in collaborative environments and is dedicated to crafting immersive user experiences.

Work Experience

Front End Developer | The Kushery | 2021 – Present

- Develop and sustain visually captivating user interfaces utilizing a wide array of technologies, including React, JavaScript, HTML, CSS, and Bootstrap
- Collaborated seamlessly with a designer to enhance our webpage's visual appeal and user experience
- Develop and implement highly responsive user interface components that are scalable and reusable
- Test and maintain UI components for optimal user-friendly experiences
- Enhanced webpage functionality for faster page requests, efficient image downloads, and improved speeds, resulting in a 20% increase in webpage loading times
- Boosted search exposure through modern SEO, resulting in a 15% increase in overall traffic
- Design compelling advertisements with Adobe Illustrator and Photoshop, emphasizing detail, aesthetics, and messaging. Resulted in a 20% increase in customer visits and revenue, as per I Heart Jane point of sale.

Supervisor | Earthbound Corp. | 2015 – 2020

- Reduced business losses by maintaining inventory and managing quality assurance for packaging and delivery
- Managed, onboarded, and mentored employees to build an inclusive work environment optimized for productivity and retention
- Utilized as a resource by employees to resolve issues or conflicts regarding workflow

Technical Skills

Languages: HTML, CSS, JavaScript

Libraries & Frameworks: React.js, Next.js, Tailwind, Styled Components, Bootstrap

Data Structures & Algorithms

Tools: Git, GitHub, Docker, Firebase, Azure, Google Analytics, NPM, Postman

APIs: REST, GraphQL, JSON

Design Tools: Adobe Illustrator, Adobe Photoshop, Figma, Miro

Core Competencies

Strong verbal and written skills, Team player, interpersonal, Problem-solving, Critical thinking, Curiosity, Self-Motivated, Flexibility, Continuous Learning, Time management, Adaptability.

Education and Certifications

BS Computer Information Systems - Web Development Administration | DeVry University, 2020

Advanced React | Scrimba - [Certificate](#)

Relevant Projects

Mockery: <https://web.mockeryhub.io/> | **Presentational Video:** [View Mockery Presentational Video](#)

Description: I Collaborated on Mockery to help frontend developers kickstart their projects seamlessly by generating mock data tailored to their precise formats and data schemas. This allows for smoother integration once APIs are finalized and deployed.

Technologies Used:

- **Frontend** - Next.js, Nextauth, JSX, JavaScript, React Hooks, Context API, Tailwind CSS, React-Flow, Miro
- **Backend** - C#
- **Database** - Cosmos DB
- **Infrastructure/Deployment** - Azure Deployment, Azure B2C, Docker, Git/GitHub, GitHub Actions

My Role:

- Designed, styled, developed, and maintained all frontend components to ensure scalability and reusability
- Helped Implemented Azure B2C for secure and seamless user authentication
- Helped Set up and managed deployment pipelines for continuous integration and deployment

Highlighted Features:

- Create, edit, delete, clone, copy mock headers, and search all mocks
- Filter mocks by workspace
- Create, edit, and delete workspaces
- Filter and delete probes
