Relevant Projects

Western Chime Demo: <https://westernchime.com/>

GitHub Repository: <https://github.com/stetsonharding/western-chime>

This project fetches the Punk API. I used React to develop many of the functionalities seen on a typical e-commerce website.

UFO Sighting Demo: <https://www.ufosightings.com>

GitHub Repository: <https://github.com/stetsonharding/ufoSightings>

This application lets the user browse and read about any exciting and unexpected UFO Sightings happening in any of the 50 US states. The user is also able to view where the sighting took place via Google Maps using the given coordinates. Built using React and Firebase for the backend.
