Software Developer looking for an opportunity to make an impact and grow my skill set, while learning and mastering new technologies as needed. A self-starter with excellent written and verbal communication skills that thrives in a collaborative environment, and is passionate about building meaningful user experiences while working with others

WORK EXPERIENCE

The Kushery (Remote)

Front-End Developer

2020 - current

- Translate designs and wireframes into high quality code.
- Build a rich UI using React, JavaScript, HTML, and CSS.
- Test and maintain components while keeping the user experience in mind, making sure the components are user friendly and fully responsive.
- Develop and implement highly responsive user interface components that are scalable and reusable.
- Optimize webpage performance as needed making sure page size, page requests, and page speeds are all fast and efficient. Thus, improving conversion rates, generating more leads, and increasing revenue.
- Increase search visibility using up to date SEO techniques and Google Analytics.
- Create layouts and advertisements with Adobe Illustrator and Adobe Photoshop while having a keen eye to detail, look, and message the advertisement displays.

Earthbound Corporation

Warehouse Manager

2015 - 2020

- Reduced business losses by maintaining inventory and managing quality assurance for packaging and delivery.
- Managed, onboarded, and mentored employees to build an inclusive work environment optimized for productivity and retention.
- Utilized as a resource by employees to resolve issues or conflicts regarding workflow.

PROJECTS

Western Chime

https://westernchime.com/

- Used Async Await and React Hooks to fetch the Punk API to get data and handle all possible edge cases and errors.
- Implemented search functionality making use of Debounce and Memoization to limit the number of API calls.
- Built pagination for a better user experience and to increase performance with load times.
- Added functionality, using React Hooks to allow the user to add/remove an item to and from their cart.
- Used React Hooks to allow the user to 'favorite' an item to view/use for a later time.
- Added functionality, making sure the users total, taxes, and grand total are adding up correctly based off items in cart.
- Created a "promo-code" input that will give the user a discount if the correct promo code is submitted as well as handle all edge cases and errors.
- Shown the ability to create functional components that are scalable and reusable.
